English: The house you have purchased was manufactured in accordance with the high quality norms. The building unit has been carefully inspected and packed. In order to avoid possible problems during the assembly carried out by yourself or the building company of your choice, we recommend that you inspect the delivery for its completeness in accordance with the list of pieces before assembly. This inspection must be carried out within 14 days after delivery to your place. Warranty claims are limited to the exchange of defective materials. Defective building parts, which have already been used or painted, are excluded from being replaced. All further claims are excluded! In cases of complaints, please pay attention to the following procedures: Please present this inspection certificate along with the sales receipt to your place of purchase. Only in cases where these documents are presented will the complaint be dealt with quickly and without complications.

Deutsch: Das von Ihnen gekaufte Haus wurde nach der hohen Qualitätsnorm gefertigt. Der Bausatz wurde sorgfältig geprüft und verpackt. Um etwaige auftretende Probleme während des Aufbaus durch Sie oder Ihre Aufbaufirma zu vermeiden, kontrollieren Sie bitte die Lieferung auf Vollständigkeit laut Stückliste vor dem Aufbau. Diese Kontrolle muss innerhalb 14 Tagen nach Anlieferung bei Ihnen erfolgen. Ansprüche auf Gewährleistung beschränken sich auf den Austausch von fehlerhaftem Material. Fehlerhafte Bauteile, die bereits verbaut oder gestrichen wurden, sind vom Umtausch ausgeschlossen. Alle weiteren Ansprüche sind ausgeschlossen! Sollte es zu einer Beanstandung kommen, beachten Sie folgende Vorgehensweise: Legen Sie Ihrem Fachhändler diesen Kontrollschein zusammen mit dem Einkaufsbeleg vor. Nur bei Vorlage dieser Unterlagen ist eine schnelle und problemlose Bearbeitung Ihrer Beanstandung möglich.

Français: La cabane que vous venez d'acheter a été fabriqué en respectant de hautes normes de qualité. L'ensemble de construction a été testé et emballé avec soin. Afin d'éviter des problèmes éventuels pendant la construction par vous-même ou la société de construction mandatée, nous vous prions de bien vouloir vérifier que toutes les pièces ont été fournies selon la liste des pièces avant que vous ne commenez la construction. Il vous incombe de faire ce contrôle dans les 14 jours après la fourniture. Les revendications en dédommagement se limitent à l'échange de matériel défectueux. Des pièces de construction défectueuses, déjà construites ou peintes, sont exclues de tout échange. Toutes les revendications ultérieures sont exclues ! Si une réclamation avait lieu, veuillez respecter le déroulement suivant : Il vous faudra présenter, à votre commerçant spécialisé, ce bulletin de contrôle avec le récépissé de l'achat. Ce ne sera que moyennant présentation de ces documents qu'un traitement rapide et sans problème de votre réclamation sera possible!

Italiano: La cassetta che avete acquistato è stata prodotta secondo la norma di alta qualità. Il kit è stato controllato ed imballato con cura. Per evitare eventuali inconvenienti durante il montaggio, si prega di verificare, prima del montaggio, la completezza della fornitura in base alla distinta dei pezzi. Tale verifica deve essere effettuata entro 14 giorni dalla consegna. Eventuali diritti di garanzia si limitano alla sostituzione di materiale difettoso. Gli elementi difettosi già montati o verniciati sono esclusi dal diritto alla sostituzione. Ogni altro diritto resta escluso! In caso di reclamazione, procedere nel modo seguente: presentare questo certificato di controllo unitamente alla prova d'acquisto al rivenditore. Solo in questo modo la Sua reclamazione potrà essere evasa rapidamente e senza problemi.

Español: La casa que ha adquirido ha sido fabricado de acuerdo con las normas de alta calidad. La construcción de la unidad ha sido cuidadosamente inspeccionada y embalada. Con el fin de evitar posibles problemas durante la montaje llevada a cabo por usted o la empresa de construcción de su elección, le recomendamos que inspeccione la entrega de acuerdo con la lista de las piezas antes del montaje. Esta inspección deberá realizarse dentro de los 14 días después del parto a su lugar. Las reclamaciones de garantía se limita al intercambio de materiales defectuosos. La construcción de partes defectuosas, que ya han sido utilizados o se pintan, no pueden ser reemplazados. Todas las otras reclamaciones están excluidos! En los casos de quejas, por favor, preste atención a los siguientes procedimientos: Por favor presente este certificado junto con el recibo de venta a su lugar de compra. Sólo en los casos en que estos documentos se presentan a la denuncia se resuelva de forma rápida y sin complicaciones.

1 General information

Dear client,

We are glad that you have decided in favour of our garden house!

Please read the assembly manual carefully before proceeding with the house installation! You will thus avoid problems and will not waste time.

Recommendations:

- Keep the house package until its complete assembly in a dry place, but not in direct contact with the ground, protected from weather conditions (moisture, the sun, etc.). Do not keep the house package in a heated room!
- When selecting the garden house location, make sure that the house will not be subjected to extreme weather conditions (areas of strong snowfall or winds); otherwise you should attach the house (for instance, with anchors) to the subsoil.

Warranty

Your house is made from high quality fir and delivered in the natural (unprocessed) form. If, despite our thorough inspection, you should have complaints, please submit the filled out control sheet and purchase invoice to the product seller.

ATTENTION: Please be sure to keep the documentation accompanying the house package! The control sheet includes the control number of the house. We can only review complaints if you submit the control number of the house to the seller!

The warranty does not cover:

- Peculiarities of wood as a natural material
- Wooden details already painted (processed with a wood preservative)
- Wooden details containing whole branches that do not endanger the stability of the house
- Colour tone variations caused by wood structure differences that do not influence wood lifetime
- Wooden details containing (caused by drying) small cracks/gaps that do not pass through and do not influence the structure of the house
- Twisted wooden details if they can nevertheless be installed
- Roof and floor boards that may have on their concealed surfaces some non-planed areas, colour differences and waning
- Complaints resulting from an incompetent manner of the installation of the house or the house subsiding due to an incompetently made foundation
- Complaints caused by introducing self-initiative changes to the house, such as the deformation of wooden details and doors/windows due to an incompetent manner of wood processing; the attachment of storm braces too rigidly, doorframes being screwed onto wall logs, etc.

The complaints covered by the warranty are satisfied to the extent of replacing the deficient/faulty material. All other demands will be excluded!

Garden house painting and maintenance

Wood is a natural material, growing and adapting depending on weather conditions. Large and small cracks, colour tone differences and changes, as well as a changing structure of wood are not errors, but a result of wood growing and a peculiarity of wood as a natural material.

Unprocessed wood (except for foundation joists) becomes greyish after having been left untouched for a while, and can turn blue and become mouldy. To protect the wooden details of your garden house, you must immediately process them with a wood preservative.

We recommend that you cover the floor boards in advance with a colourless wood impregnation agent, especially the bottom sides of the boards, to which you will no longer have access when the house is assembled. Only this will prevent moisture penetration.

We definitely recommend that you also process the doors and windows with a wood impregnation agent, and do that namely both inside and outside! Otherwise the doors and windows can become twisted.

After the house assembly is completed, we recommend for the conclusive finishing a weather protection paint that will protect wood from moisture and UV radiation.

When painting, use high quality tools and paints, follow the paint application manual and manufacturer's safety and usage instructions. Never paint a surface in strong sunlight or rainy weather. Consult a specialist regarding paints suitable for unprocessed softwood and follow the paint manufacturer's instructions.

Having been properly painted, your garden house's lifetime will increase substantially. We recommend that you inspect the house thoroughly once every six months.

2 Preparation for assembly

Tools and preparation of components

To assemble the garden house, you will need the following tools:

assembly aid

ladder

hammer

water-level

screwdriver

saw

knife

measuring tape

pliers

drill

ADVICE: To avoid splinters, we recommend that you wear the corresponding protective gloves during the assembly process.

Preparation of components:

Sort the components based on the wall plans (see Technical Specifications) and place them at the sides of the house in the installation sequence.

ATTENTION: Never place the components directly on grass or a muddy surface because it will be very difficult or even impossible to clean them up later!

Installation manual

Foundation

A good foundation is the most important aspect guaranteeing the duration and safety of your house. Only a completely level and bearing foundation will ensure problem-free installation of the house, its stability and especially the matching of the doors. With a good foundation, your house will stand for many years more.

Prepare the foundation so that its upper edge extends from the ground to a height of at least 5 cm. At the same time make sure that there are sufficient air apertures under the house floor for ventilation.

Consult an expert in this field or have the foundation prepared by specialists.

Walls

When installing the walls, it is important to remember that:

- The logs are always assembled with their tongue upwards!
- If necessary, use the hitting block and hammer! Never directly hit the tongue with the hammer!

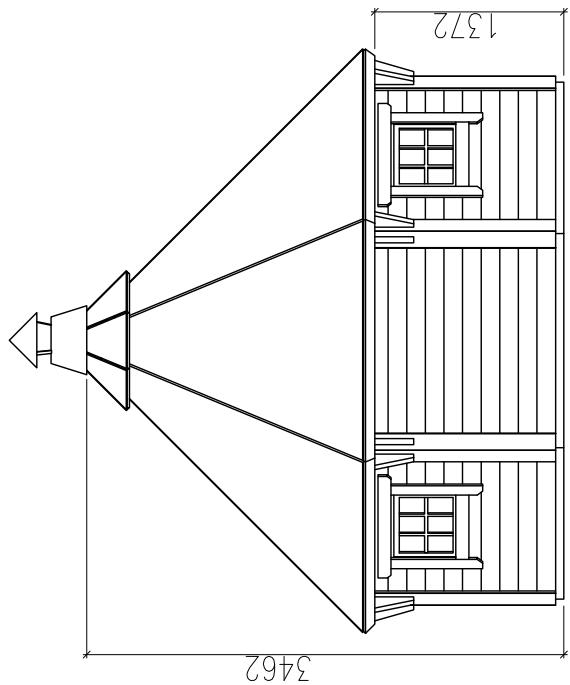

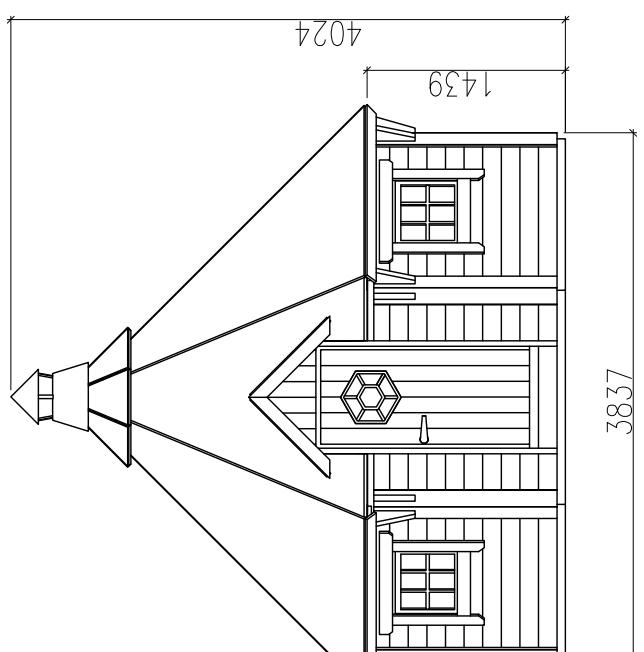

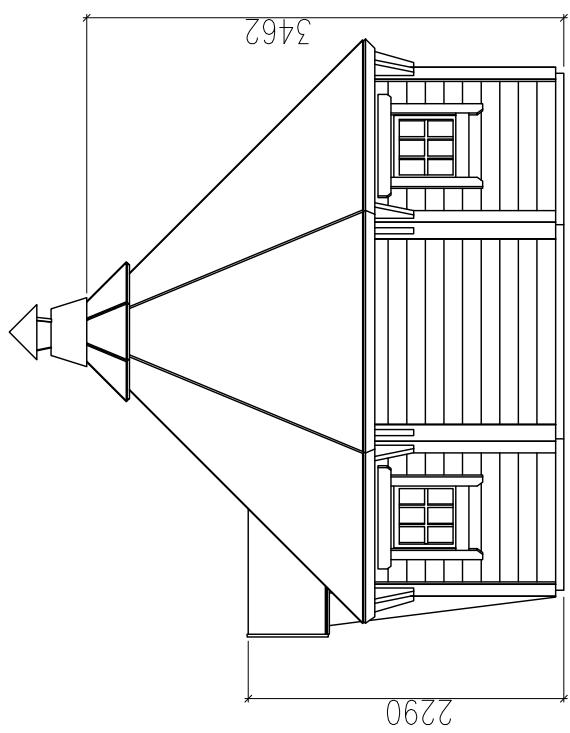

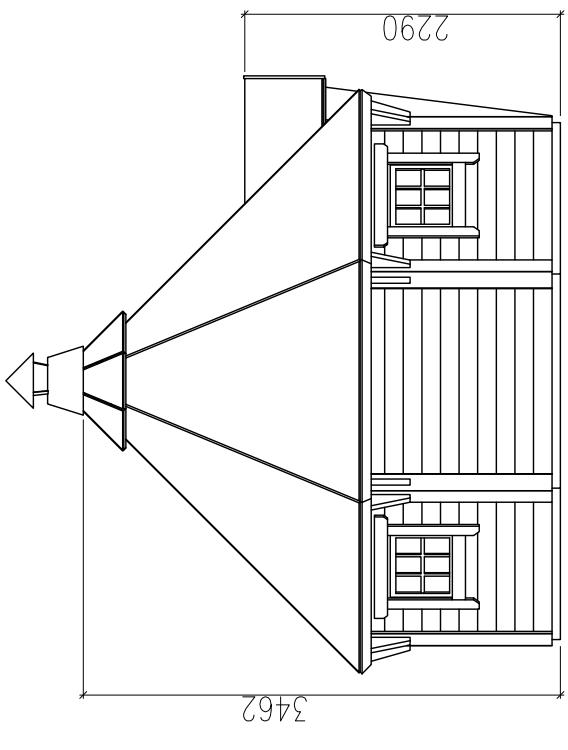

Install the walls in accordance with the appended wall plans (see Technical Specifications).

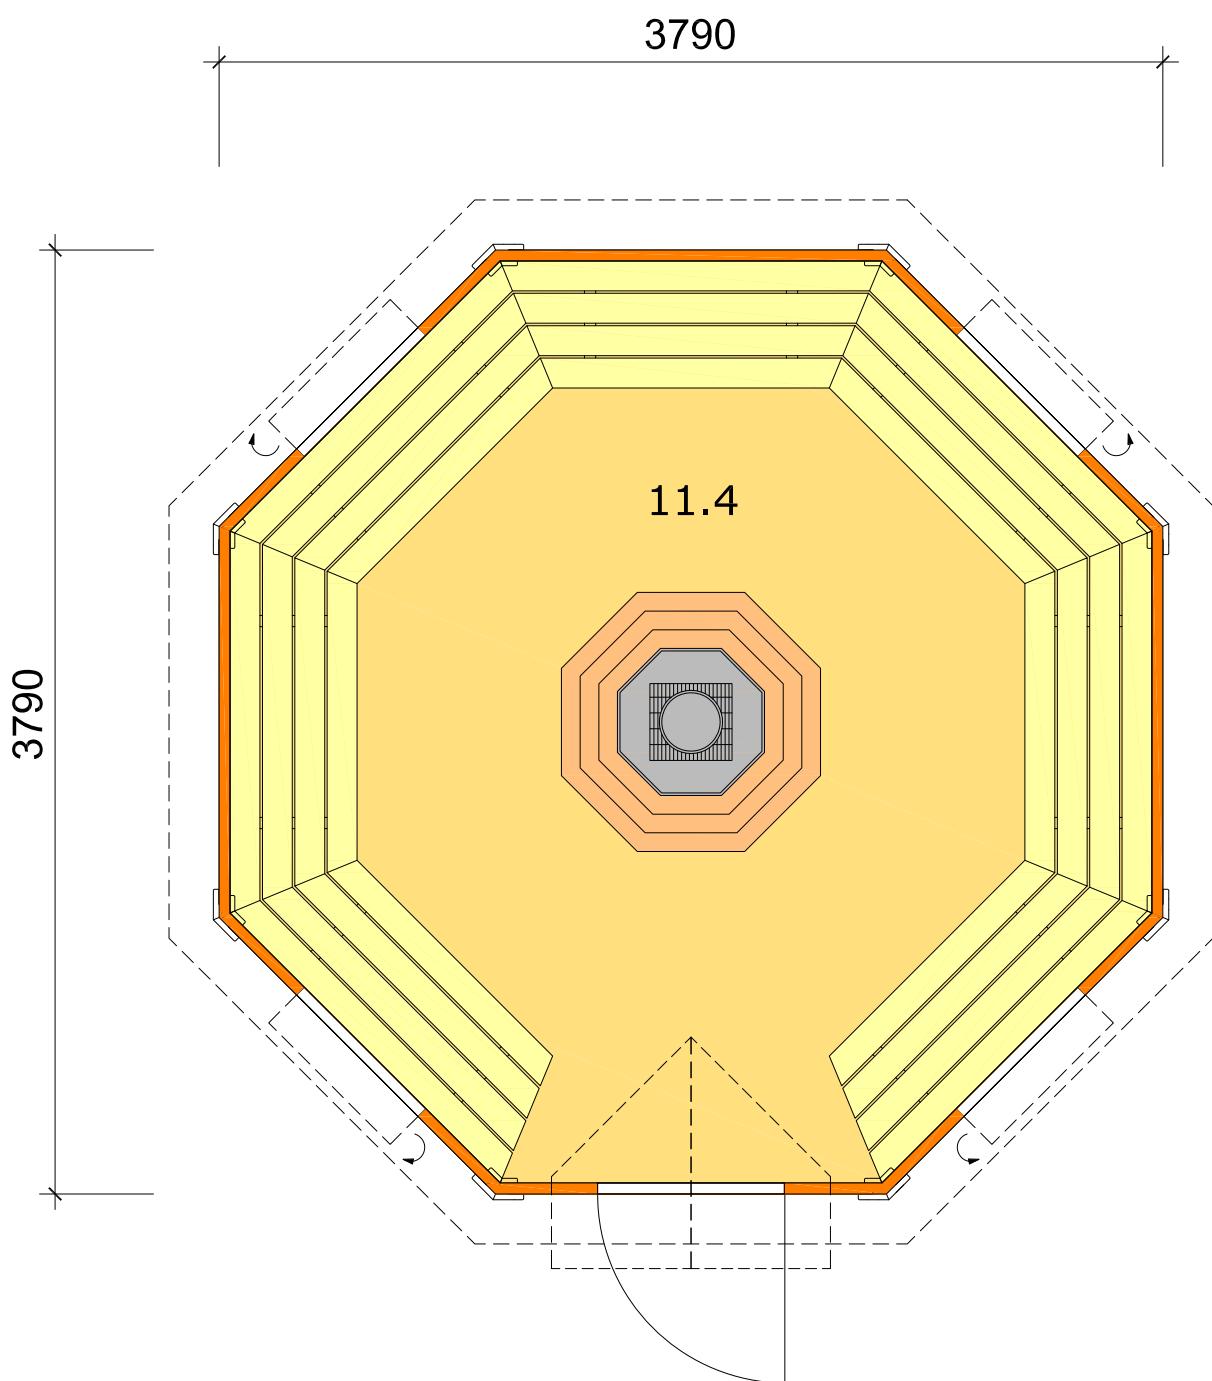

Floor

ATTENTION: Depending on the climate at the house location, the floor boards can either swell or diminish. If the floor boards are very dry while the climate is damp, they will easily absorb moisture. In this case, the floor boards should not be attached very densely to avoid likely bulging. Leave some space (1-2 mm) between the floor boards to allow for swelling. But if your climate is warm and dry, you can install the boards densely because they will become drier and spaces may appear between them.

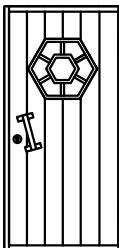

We wish you total success with the house installation and much joy with this house for many years to come!
